

## South Wales Dark Forces Update

Dear S,

I am very grateful for the input from European courts but I believe any process, legal or lay, will be pointless and only aggravate and entrench her mother in protracting the time period into life. The underlying problem was when the SWP attempted to snatch G just to get at me again.....My 20 year running damages claim and their 8th June 2009 machine gun/MAPPA fabrication is proof enough! Almost any mother could be forgiven for doing the same.

Cardiff courts continue their ban into their 9th year, incidentally on a 'dark forces' whim, by preventing my communications, 'losing' paid for service documents on HMP Cardiff, not sending out notice of hearings or allowing my entry into any of their buildings. My local lawyer, as predicted on a small CCRC procedure, has been well and truly shat on.

I have again spent pointless days, living in the car in London, Bristol and Birmingham trying to find a lawyer for anything, anything at all.

I entered my 102nd law firm, yesterday, with a choice of many civil or criminal simple matters....cash up front. The 'black list' has my name added to it as I leave and quickly re-circulated once my enquiry for help is made in what ever UK city, so far.

Some of those in the CAA keep sending me the usual 'weasel ' words with no intention, what so ever, of helping or repairing the damage done by Dr Tallant's arrogant++ conduct. D-Day cub, **G-KURK**, is ready, as of yesterday's successful Winchester test flight, for South Africa and Falklands but not the pilot.....'dark forces' are seeing to that. **G-KIRC** will be ready in a week or so to accompany '*Liberty Girl II*' but both instrumentation and tankage '*kirkifications*' may have to wait until Algeria.

Even in Europe I keep getting hassle at the country's borders. When in Brittany, to sell off the cottages and landing strip, there is always delay at each port for data scanned of the chip, to be written down by hand, all due to South Wales Police's continued fabricated PNC data. My visit to Newport passport office yesterday, for example, demanding explanation confirmed my worst fears as to my unlikelihood of entry into Africa other than 'under the radar'

I enclose a South Wales Police 'leaked' document containing only my name, spelt correctly, to be about the only fact on the paper being correct. The rest has been systematically fabricated to prevent my successive bail applications succeeding, to prevent preparation for my cases and to double my last prison term without the need of parole board hearings (both sessions blocked), court or jury. Remember, the 2014 parole board hearing, for my release, was cancelled as no doctor in South Wales was 'found' prepared to contradict the now sacked police psychiatrist's fabricated psychiatric report used for their application to 'Ashworth' me for life.

Serious abroad findings, following police repeatedly blocking my Cardiff hospital surgery while I was in prison, are now major on my mind. Remember, three prison officers in Swansea all said, independently of each other, they had never experienced before such a control and interference in a prisoner's life by their local police as was going on with me. I was allowed only one phone number, remember, to ring out on, my sister and only that was because law, I suspect, prevented obstruction to her foreign jurisdiction. All other phone numbers were banned by South Wales Police.

T is doing sterling stuff and BC and I must go to see Norman tomorrow...by cub or car....who will come as well at short notice? Could pick up MB etc en route

On entry to Cardiff yesterday to obtain medical attention, from Newport passport arguing, surprise, surprise, I was again quickly chased by police in vehicles and cornered in a car park....
